

Demanding jobs require
tough solutions.

PLASTRONICS

Plastronics has been in the Semiconductor business for over 30 years.

We understand requirements for sockets that can withstand severe testing environments. Plastronics products are designed to withstand the harshest QA & reliability testing conditions.

Through the good times and bad we have consistently:

- **Held to a 2-3 week typical lead time**
- **Averaged at least 75 new sockets per year since 1982**

Plastronics offers the widest selection of made in the USA LCC, PLCC, SOIC, TQFP, LGA, BGA, & QFN sockets in the industry.
